

# KHUSHI CHAVDA

DATA ANALYST | AI/ML ENGINEER | GEN AI ENTHUSIAST

## CONTACT

- +91 8200954322
- khushichavda2214@gmail.com
- Pune, Maharashtra
- [www.linkedin.com/in/khushichavda](https://www.linkedin.com/in/khushichavda)

## EDUCATION

**AJEENKYA DY PATIL UNIVERSITY**  
Pune, Maharashtra  
B.Tech - CSE 2022 - 26

**SHREE SWAMINARAYAN  
INTERNATIONAL GUNATIT  
VIDHYADHAM**  
Gujarat  
Senior Secondary (XIIth) 2022

## SKILLS

### Languages

Python, SQL, Java, HTML/CSS, C++

### Data Analysis & Visualization

Power BI, Tableau, MS Excel, Pandas, NumPy

### Machine Learning & AI

Scikit-Learn, TensorFlow, Keras, Machine Learning, Deep Learning, NLP, Gen AI, Predictive Modelling

### Gen AI & Modern AI Tools

LangChain, OpenAI APIs, Prompt Engineering, Explainable AI (SHAP, LIME)

### Databases & Tools

MySQL, Git, Github

## LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- Gujarati (Native)

## CERTIFICATIONS

- Delloite Data Analytics Job Simulation
- Oracle Cloud Infrastructure Foundations Associate - Oracle University
- JP Morgan Software Engineering Job Simulation
- Software Testing Certification
- ICSICE 2026 Conference
- Data Analysis Certification - LinkedIn Learning

## PROFILE

B.Tech Computer Science graduate specializing in Data Analytics, Machine Learning, and Generative AI. Skilled in Python, SQL, Power BI, TensorFlow, Scikit-learn, and AI frameworks like LangChain and OpenAI APIs. Experienced in predictive modeling, NLP, data visualization, and end-to-end ML pipeline development through internship and research work. Published research in Explainable Healthcare AI focused on interpretable deep learning models for skin cancer classification.

## WORK EXPERIENCE

### AdGama Digital Pvt. Ltd.

MAR - MAY 2026

#### Data Science Intern

- Worked on machine learning and analytics projects involving predictive modeling, classification, and business intelligence reporting.
- Performed data preprocessing, feature engineering, exploratory data analysis (EDA), and model evaluation using Python, Pandas, and Scikit-learn.
- Built interactive Power BI dashboards to visualize customer behavior, campaign performance, and business insights.
- Applied ML and deep learning techniques using TensorFlow, XGBoost, and NLP libraries for AI-driven solutions.
- Contributed to end-to-end ML pipeline development and explainable AI workflows using SHAP and LIME.

## PROJECTS

### AgentHire AI: Multi-Agent Intelligent Recruitment System using LLMs

Tech Stack: Python, LangChain, OpenAI API, Streamlit, FAISS, NLP

- Developed a multi-agent AI recruitment platform using LLMs, LangChain, and NLP techniques to automate resume screening, ATS scoring, skill extraction, and candidate-job matching through an interactive Streamlit interface.

### Explainable Healthcare AI for Skin Cancer Classification

Tech: TensorFlow, CNN, SHAP, LIME

- Built a deep learning-based healthcare AI system for skin cancer classification using CNN models and Explainable AI techniques such as SHAP and LIME to improve prediction transparency and model interpretability.

### Adaptive Traffic Signal Control System using Deep Reinforcement Learning

Tech Stack: Python, Deep Q-Learning (DQN), OpenCV, YOLO, TensorFlow

- Designed an intelligent traffic management system using Deep Q-Learning, YOLO, and OpenCV to dynamically optimize traffic signal timings based on real-time vehicle density and congestion analysis.
